3D Leather Panel for Walls & Ceilings

A Product of Hi-Teq India

## About us

### Who are we?

With great expertise and client centric approach, "Hi-Teq India" founded in 2016, have earned great success as a manufacturer and supplier of 3d leather panel / tiles for wall and ceiling. Our scrupulous business dealing, qualitative & cost effective product range , and on time delivery are some of the notable attributes that have always played a vital role in accomplishment of complete client satisfaction.

Our modern & sophisticated production unit is equipped with necessary machinery and tools to help us reach standards of international quality.

With complete understanding of the business and products, its very natural that "SILFRA" brand of products remain the client's first choice.

### What do we do?

3d leather panel is a new concept in decoration of wall and ceiling which adds to the current pursuit of enhancing plain looking surfaces. These 3d leather finished panels make interior decoration visually rich, pleasant and luxurious in feel and touch.

### Why only "Silfra" leather panel?

- It comes in small size (400mm x 400mm x 25mm, 300mm x 300mm x 20mm, 300mm x 600mm x 25mm), to suite all sizes of wall.
- Its versatile, as it could be used to decorate wall and ceiling as well.
- Its water proof, unlike MDF panel which can not resist even the moisture in walls.
- Its termite and borer proof, unlike MDF
- Its easy to install, unlike MDF which requires additional carpentry work.
- its installation is dust free, smell free.
- Installation is faster.
- Its free of wastage, as you buy only what is required, unlike MDF (minimum 1 sheet of 8'x 4')
- Its not required to be painted, as its elegant and rich in leather finish.
- Soft and spongy in feel.
- Above all its more economical as compared to MDF.

## Installation Guide

### Step One:

- 1, Make sure the surface of wall flat and clean.
- 2, If the wall already covered with skin coar, pls repaint a coat of interior latex or primer onto it.

### Step Two:

- 1, Square off the wall according to the size of panels.

### Step Three:

- 1, Hot melt glue and silicone is necessary.
- 2, Squeeze glue onto each panel.
- 3, Hot melt glue is rapidly setting. Silicone has the effect of strengthening and consolidation.

### Step Four:

- 1, Install panels in turn from center of wall to around. ↗

- 2, When fixing panels, pls press panel against wall for 10 to 20 seconds.
